Professional Summary

Cybersecurity professional with practical experience in Vulnerability Assessment and Penetration Testing (VAPT), primarily focused on web application, API, and thick client security testing. Skilled in identifying and validating security vulnerabilities across applications and systems. Strong understanding of web security concepts and security best practices.

Profile Highlights

- Web Application Security Testing
- API & Thick Client Security
- Vulnerability Assessment & Penetration Testing
- Security Assessment & Vulnerability Validation
- Appreciated for active participation, communication skills & creative problem-solving.

Education

Amity University Rajasthan

MSc in Cyber Security

- First Division

Jaipur, India.

2022 - 2024

Parul University

BSc In Forensic Sciences

- First Class

Vadodara, India

2019 - 2022

Work Experience

C-DAC (Centre for Development of Advanced Computing)

Project Engineer

Cyber Security Intern

Hyderabad, India

Dec 2024 - Current

May 2024 - Oct 2024

- Performed Vulnerability Assessment and Penetration Testing (VAPT) on web applications, APIs, and systems.
- Assessed and categorized vulnerabilities based on exploitability, business impact, and security risk.
- Conducted manual security testing for authentication, session management, and access control vulnerabilities.
- Delivered hands-on threat modelling training sessions focused on identifying and mitigating security threats during the development lifecycle.
- Contributed to security awareness initiatives by developing content on secure practices and emerging cyber threats.

University Projects

DDoS Attack Detection using Machine Learning

Amity University Rajasthan

Sep2023 - Nov 2023

- Developed a machine learning-based system for detecting DDoS attacks using network traffic datasets.
- Performed feature extraction, data analysis, and model training to improve detection accuracy.
- Utilized Python and machine learning techniques for traffic classification and attack detection..

Malware Detection using Machine Learning

Amity University Rajasthan

Feb 2023 - May 2023

- A machine learning project focused on understanding and extracting a set of features from a Malware Dataset and training multiple Machine Learning Classifiers and Models for optimal Accuracy rate.
- Executed on Google Collab, using Python and Machine Learning Models concluding with the best existing model suitable to train, finetune and perform for this purpose.
- **Technical Skills:** Machine Learning, Python, Google Collab.
- **Soft Skills:** Time Management, Presentation skills, Report Writing.

Skills

- VAPT – Web Application and Services Security Testing.
- Operating Systems: Kali Linux, Windows.
- Scripting: Bash Scripting, Basic Python
- Network Security
- Threat Modelling.

Certification

- Certified Ethical Hacker v13.
- Introduction to Cyber Security – Cisco

Achievements

2023 Military Training Camp Winner Amity University Rajasthan, *India*.

Conference/Seminar Attended

- Training on "Cyber Threat Intelligence". Nullcon, Hyderabad, TG, 2025.
